

**Reference Number: 025418/0114**

## **Title of the Invention**

ADJUSTABLE MULTI MAGNETIC HOLDER

## **Invention**

The invention relates to a surgical rug made of flexible, liquid-resistant, washable, perforated plastic and its derivatives, which is used in surgical operations, enables the transportation of basic operating equipment, and is placed on the desired place on the patient's body before the operation. It has a structure that can be changed according to the size of the patient, the area to be operated, the number and type of surgical instruments used.

## **Advantages**

By the help of this invention, surgeons reach easy and fast access to the instruments during the operation, while this magnetic holder prevents the instruments from falling on the ground, thus eliminating the hygiene problem.

## **Current Status**

Turkey: Pending

## **Keywords**

Surgery rug, magnetic equipment
